

ALEXANDER KREMESHNOI

SOFTWARE DEVELOPER

ABOUT ME

I am a developer with five years of experience in web technologies. My career has evolved into a full-stack developer role, with experience in backend and mobile application development, but my primary focus has been on frontend web applications. I also emphasize writing unit tests, creating technical documentation and carefully structuring repository file architecture to address potential issues. Above all, I adhere to the principle of common sense in all aspects of my work. I am open to both mentoring and being mentored.

In my free time, I enhance my skills. I am also working on the next iteration of my personal project "Otaku Library," which aims to become a comprehensive social network.

EXPERIENCE

Sun Finance, Riga, Latvia

Fintech

sunfinance.group

OCTOBER 2022 - PRESENT

Front-end / Back-end

My Tech Stack:

JavaScript, TypeScript, PHP, Vue, Nuxt, React, Zend (Laminas), Jest, PHPUnit, Docker, Mermaid, AWS

Key Contributions:

- Developed a monorepo from scratch using React for streamlined application management.
- Created a new product for microloan issuance based on the monorepo, tailored to the company's requirements.
- Supported and deployed new features within the backend ERP application, ensuring stable and continuous improvement
- Developed and maintained the front-end for a CMS Translation Service.
- Authored comprehensive technical documentation to facilitate knowledge sharing and maintain project clarity.
- Wrote unit tests to ensure code quality and prevent regressions.
- Implemented various team improvements, including Git conventions adherence, enhanced code review practices, and led technical meetups on computer science topics.
- Proposed and introduced architectural enhancements to the repository for better scalability and maintainability.
- Built two products from scratch and contributed to the growth and support of six additional products.
