ABOUT ME

I am a developer with seven years of experience in web technologies. My career has evolved into a full-stack developer role, with experience in backend and mobile application development, but my primary focus has been on frontend web applications. I also emphasize writing unit tests, creating technical documentation and carefully structuring repository architecture to address potential issues. Above all, I adhere to the principle of common sense in all aspects of my work. I am open to both mentoring and being mentored.

EXPERIENCE

Sun Finance, Riga, Latvia

Fintech
sunfinance.group

OCTOBER 2022 - PRESENT

Full-stack (Front-end / Back-end)

My Tech Stack:
JavaScript, **TypeScript**, **PHP, Bash, SQL,**
Vue, Nuxt, React, Zend / Laminas, Symfony,
Jest, PHPUnit,
Storybook,
Docker, AWS

Key Contributions:

- **Built a monorepo from scratch** using React to streamline application management and development workflows
- **Implemented WCAG standards** across multiple projects to ensure compliance and inclusive user experience
- **Developed a new front-end application** for microloan issuance leveraging the established monorepo infrastructure
- **Maintained and enhanced backend ERP systems** by deploying new features and ensuring stable, continuous operations
- **Created and maintained front-end interface** for a CMS Translation Service platform
- **Produced comprehensive technical documentation** to facilitate team knowledge sharing and maintain project clarity
- **Led technical process improvements** including Git workflow standardization, enhanced code review practices, and organized team knowledge-sharing sessions
- **Designed and implemented architectural improvements** to enhance repository scalability and long-term maintainability
- **Delivered end-to-end product development** by building two applications from scratch and contributing to six additional product initiatives
- etc.

RELATED SKILLS

Programming Languages:
JavaScript, TypeScript

API Architecture styles:
RESTful, **WebSocket**, **GraphQL**

Paradigms:
OOP, **FP**

Front-end:
Vue, Nuxt, React, Next

Back-end:
Node

Mobile:
React Native

Other:
Rust, Lua, PHP, SQL, Bash,
Actix Web, Zend / Laminas,
Storybook, Material, Tailwind,
Jest, PHPUnit, Cargo Test,
Webpack, Vite, Docker,
Kong, Apache APISIX,
PoLP, SoC, Fail Safe / Fail Fast,
Layered Architecture, FSD, SOLID, CQRS,
Point-free

LANGUAGES

Native speaker of **Russian**
Fluent **Ukrainian**
Upper-Intermediate in **English**

Kozak Group, Kyiv, Ukraine
Web Development Agency
kozak-group.com

JANUARY 2021 - OCTOBER 2022

Front-end / Mobile

My Tech Stack:
JavaScript,
Vue, React, React Native,
Hasura, Docker

Key Contributions:

- **Developed a comprehensive parking management system**
  featuring three integrated front-end CRM applications for streamlined operations
- **Built a complete news portal solution** including both public-facing front-office interface and administrative CMS backend
- **Integrated security ecosystem** comprising a front-end CRM application for operators and a mobile application for drivers

Talkable, Kyiv, Ukraine
Referral Company
talkable.com

NOVEMBER 2019 - FEBRUARY 2020

Front-end

My Tech Stack:
JavaScript, CoffeScript, Ruby,
Ruby on Rails

Key Contributions:

- **Updated and enhanced website front-office** as an independent contractor, maintaining compatibility with monolithic codebase structure

Freelance, Kharkiv, Ukraine
DECEMBER 2017 - OCTOBER 2019

Front-end

My Tech Stack:
JavaScript, CSS, HTML, JQuery

PERSONAL PROJECTS

Otaku Library
Social Network

JANUARY 2021 - OCTOBER 2022

Full-stack (Front-end / Back-end)

My Tech Stack:
TypeScript, Rust, Lua, Bash, SQL
Next.js Actix Web,
PostgreSQL, Redis,
Apache APISIX, Docker

Turtle Van
Multifunctional Discord Bot (Music, AI, etc.)

JANUARY 2021 - OCTOBER 2022

Back-end

My Tech Stack:
Rust,
Docker,
Serenity, Songbird, Fly.io
